PROFESSIONAL SUMMARY

UI/UX & Product Designer with 2+ years architecting enterprise B2B SaaS across HRMS and Payroll. Approaches product problems from the logic outward — business rules, user roles, and system dependencies — before translating them into workflows, information architecture, and production-ready interfaces. Experienced in enterprise UX, UX research, design systems, workflow architecture, and engineering collaboration.

HOW I WORK

01 DOMAIN DISCOVERY
Understand business rules, compliance requirements, operational policies, stakeholders, and data dependencies before defining the interface.

02 USER STORIES & FLOWS
Break requirements into roles, journeys, permissions, states, exceptions, and edge cases.

03 PROTOTYPE & VALIDATE
Rapidly test information architecture, task flow, hierarchy, data density, and interactions before high-fidelity UI.

04 USABILITY & BUILD
Validate task completion with users and work with engineering to ensure solutions are practical, reusable, and production-ready.

CORE CAPABILITIES

UX Research: Domain Discovery, User Interviews, Usability Testing, Qualitative Synthesis, Journey Mapping
Product & UX: Information Architecture, Workflow Architecture, User Stories, User Flows, Problem Framing, Interaction Design
UI & Design Systems: Design Systems, Figma Components, Design Tokens, Responsive Layouts, Data Tables, State Logic
Prototyping & Handoff: Wireframing, Interactive Prototyping, Engineering Collaboration, Front-End Feasibility, Tailwind/React Handoff
Tools: Figma, Antigravity, AI-Assisted Development

PROFESSIONAL EXPERIENCE

User Experience Designer | Digylax Private Limited • Coimbatore, Tamil Nadu *Oct 2024 – Present*

- Design enterprise B2B SaaS experiences across HRMS and Payroll, translating complex business requirements and operational rules into scalable product workflows.
- Architect multi-role employee lifecycles such as onboarding and exit workflows, mapping dependencies across HR, administration, IT, managers, and employees.
- Design operational workflows for statutory compliance and asset management, including data-heavy tables, status systems, filtering, validation, and error states.
- Design HR analytics and reporting experiences that turn high-density workforce data into structured dashboards and actionable views.
- Structure navigation for an LMS module across courses, assessments, and certifications for different user roles.
- Follow a logic-first UX process: discover domain rules and dependencies, decompose requirements into user stories and edge cases, validate architecture through rapid prototypes, and refine solutions through usability feedback and engineering collaboration.

Production Executive | Jayanti Herbs & Spice • Coimbatore, Tamil Nadu *Oct 2022 – Dec 2022*

- Supported day-to-day production operations and coordination; early exposure to operational workflows.

SELECTED PROJECTS

Travel by Toshiv — Recruitment & Overseas Jobs Platform (Independent Product Design + Web Implementation)
Live product: travelbytoshiv.com

- Designed the product structure and UX for a live overseas-recruitment platform, from information architecture through implementation — including a dedicated foldable/tablet breakpoint alongside desktop and mobile.
- Mapped journeys across job discovery, visa support, document preparation, and consultation booking.
- Used Antigravity for AI-assisted implementation, translating the design into a functioning live product.

Robuster Ride — On-Demand Mobility Concept (Self-Directed Design Project)

- Designed the core booking-to-dispatch flow for a ride-hailing concept — fare transparency, driver onboarding, and multi-tier vehicle packages. Used to build and practice mobile interaction design and prototyping.

EDUCATION

Bachelor of Technology (B.Tech), Electrical & Electronics Engineering
Karunya Institute of Technology and Sciences, Coimbatore | 2015 – 2019
